Description

Hello,

Last night I got following packages upgraded on my centos 6.3 (x86_64) box:

Aug 22 02:20:30 Updated: puppet-2.7.19-1.el6.noarch
Aug 22 02:20:30 Updated: puppet-server-2.7.19-1.el6.noarch

Since then, foreman-proxy service refuse to start with following errors :

It works fine if I disable ":puppet: true" in /etc/foreman-proxy/settings.yml but we need foreman-proxy to manage puppet.

I tried to downgrade package with "yum downgrade puppet puppet-server" :
Aug 23 16:48:11 Installed: puppet-2.7.18-1.el6.noarch
Aug 23 16:48:11 Installed: puppet-server-2.7.18-1.el6.noarch

```
[root@server puppet]# service foreman-proxy start
Starting foreman-proxy : WARNING: Missing SSL setup, working in clear text mode !
```

```
[   OK   ]
```

I experienced the same issue when using puppet.noarch 0:2.7.19-1.el6 and puppet-server.noarch 0:2.7.19-1.el6. Here is some output from what trying to start foreman-proxy:
