

Smart Proxy - Bug #18369

Foreman-proxy timeout - Error: ERF12-4115 [ProxyAPI::ProxyException]

02/02/2017 09:16 AM - Slagian Momirovici

Status: Duplicate	
Priority: Normal

Category: Puppet	
Target version:	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases: 1.13.2
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description	
Hi,	
We have 4 environments -- with multiple classes inside. It seems the problem increased since we added more classes inside the environments.	
Our problem: If we add a new module to an environment -- we need first to hit import, like 3-5 times ==> till the environment changes are detected.	
Can you please help us related?

History

#1 - 02/02/2017 09:17 AM - Slagian Momirovici

- Related to Bug #17942: Timeout during Puppet class import, slow re-initialization of Puppet 3 added

#2 - 02/02/2017 09:17 AM - Dominic Cleal

Which version of Puppet is in use, and which version is specified in the smart proxy's puppet.yml configuration?

#3 - 02/02/2017 09:20 AM - Slagian Momirovici

- File environments.png added

- Subject changed from Foreman-proxy timeou - t Error: ERF12-4115 [ProxyAPI::ProxyException] to Foreman-proxy timeout - Error: ERF12-4115 [ProxyAPI::ProxyException]

I've attached also our environments for info.
thank you in advance

#4 - 02/02/2017 09:29 AM - Slagian Momirovici

our puppetmaster server: 3.8.5-5.1

in the foreman-proxy/
puppet.yaml

```
1. Puppet version used
   :puppet_version: 3.8.5
```

smart-proxy deployed under separate user => foreman-proxy that uses rvm

```
puppetmaster:/apps/deployer/foreman-proxy # su - foreman-proxy
foreman-proxy@puppetmaster:~> which puppet
/home/foreman-proxy/.rvm/gems/ruby-2.1.0/bin/puppet
foreman-proxy@puppetmaster:~> puppet --version
3.8.7
```

#5 - 02/02/2017 09:29 AM - Slagian Momirovici

does it affect if the gem used is 3.8.7?

#6 - 02/02/2017 09:32 AM - Dominic Cleal

- *Status changed from New to Duplicate*

Thanks, since it's Puppet 3 I think it's a duplicate of the issue you've already linked it to so I'm going to close it. If you believe it's a different issue for some reason, please add more info.

#7 - 02/03/2017 05:48 AM - Slagian Momirovici

Hi Dominic,

I am a little confused - where should I add this setting?
environment-class-cache-enabled ??

#8 - 02/08/2017 03:43 AM - Dominic Cleal

That's a Puppet Server 2.x (i.e. Puppet 4) setting, I don't think it's relevant to you using Puppet 3.
