

## Foreman - Bug #18427

### Hostgroups don't have any puppet classes (or are removed upon editing a hostgroup)

02/08/2017 01:13 PM - Daniel Kimsey

<b>Status:</b>	Resolved		
<b>Priority:</b>	Normal

<b>Difficulty:</b>			
<b>Triaged:</b>			
<b>Bugzilla link:</b>		<b>Fixed in Releases:</b>	
<b>Pull request:</b>		<b>Found in Releases:</b>	1.13.3
		<b>Red Hat JIRA:</b>	
<b>Description</b>			
When I open a host group, there are no assigned/available puppet classes.			
If I make save changes to a host group, the assigned puppet classes are removed.			
Additionally, classes are only selectable if I:			
<ol style="list-style-type: none"><li>1. Edit the hostgroup</li><li>2. Change the environment from the desired value</li><li>3. Change the environment back to desired value.</li><li>4. Switch over to the puppet classes tabs</li><li>5. Re-assign classes</li><li>6. Save.</li></ol>			
After saving, hammer shows the classes are assigned.			
This pretty much makes the hostgroups unusable from the UI since they are wiping out all the classes.			
Updating a hostgroup from hammer appears to work correctly.

#### History

##### #1 - 02/09/2017 03:05 AM - Dominic Cleal

- Category changed from Web Interface to Puppet integration

This should only happen if the classes are unavailable in the selected environment, ensure that the classes are listed as being in that environment under Configure > Puppet classes. Try with Foreman nightly too, as [#3551](#) may make the behaviour clearer, and if you're using a non-admin user, try one with full admin privileges in case the issue is authorisation-related.

##### #2 - 02/09/2017 10:40 AM - Daniel Kimsey

This is likely a duplicate then. I didn't realize that ticket was recently updated, I only glanced at the creation date and then ignored it.

I'll confirm when the next version hits release for Katello. I cannot test the nightly in my environment at this time.

Daniel, any insights here?

**#6 - 05/17/2017 12:22 PM - Daniel Kimsey**

We haven't yet upgraded [Enterprises are slow to upgrade ;)]. If you feel the issue is likely to be resolved by that ticket, just close this as a duplicate. I'll re-open if the issue still exists after upgrade.

Thank you!
