Pull request:	

Description

Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1293443

Description of problem:

When using IPA/IdM authentication and the user has more than one email address, the user is not created and the following error message appears:

```
ActiveRecord::RecordInvalid
```

```
Validation failed: Email address is invalid
```

```
app/models/user.rb:253:in `block in find_or_create_external_user'
```

```
app/models/concerns/foreman/thread_session.rb:73:in `as'
```

```
app/models/concerns/foreman/thread_session.rb:79:in `as_anonymous_admin'
```

```
app/models/user.rb:251:in `find_or_create_external_user'
```

```
app/services/sso/apache.rb:38:in `authenticated?'
```

```
app/controllers/users_controller.rb:68:in `login'
```

```
app/models/concerns/foreman/thread_session.rb:33:in `clear_thread'
```

```
lib/middleware/catch_json_parse_errors.rb:9:in `call'
```

Version-Release number of selected component (if applicable):

How reproducible:

Always

Steps to Reproduce:

1. ipa user-add --first=Hans --last=Wurst --email=hwurst@example.com --email=hanswurst@example.com hwurst
2. Log in to the WebUI

Actual results:

User not created

Expected results:

User created

Additional info:

Workaround: Remove all but a single email address from the user, log in to create the user and add the additional email addresses again.

- Category set to Authentication

Is this when using mod_lookup_identity? Which version? Ensure you're on 0.9.0.

The module should be configured to only pass a single value of the attribute through to Foreman (at least from that version), so if values are getting concatenated then I think it's either a bug there or misconfigured.

Else more information would be useful to see what the email field and environment variables are set to.
