Foreman - Support #18692

Foreman don't show all entries from DB

Description

Foreman don't show all entries from DB, which is sometimes disallowing creation of new entries because they're in DB but I can't see them in webUI. I append the screenshot of Installation Media in webUI and from CLI. Is there some problem on connection between Foreman and DB?

Do you have organisations or locations enabled? If so, ensure the media are assigned to the correct contexts, or change your context from the menu - or disable the feature if you're not using it.

Please note that the IRC channel or mailing list are best for support questions: https://theforeman.org/support.html

Thanks, that helped. I changed the organization to "Any organization" and now i can see all.
