

Foreman - Bug #18720

Usergroup members are being removed after running `/usr/sbin/foreman-rake db:sessions:clear`

02/28/2017 07:01 AM - Mateusz Gozdek

Status: New	
Priority: Normal

Description	
<p>I have following problem. All my users are authorised externally. When I add user to the group, it correctly appears in both <code>usergroup_members</code> and <code>cached_usergroup_members</code> tables. However if I add user to the group and then run <code>/usr/sbin/foreman-rake db:sessions:clear</code>, created entries are being removed on next user authorisation. User entry stays untouched.</p> <p>I tried to find, what can be the cause, but no luck so far.</p> <p>The problem is, that <code>/usr/sbin/foreman-rake db:sessions:clear</code> is a cronjob which is running every 24h, so every changes I do during the day are gone on the next day.</p> <p>Environment:</p> <ul style="list-style-type: none">• OS: Ubuntu 16.04.2 LTS• DB backend: PostgreSQL 9.6.2
