Foreman - Bug #18720

Usergroup members are being removed after running `/usr/sbin/foreman-rake db:sessions:clear`

Description

I have following problem. All my users are authorised externally. When I add user to the group, it correctly appears in both usergroup_members and cached_usergroup_members tables. However if I add user to the group and then run /usr/sbin/foreman-rake db:sessions:clear, created entries are being removed on next user authorisation. User entry stays untouched.

I tried to find, what can be the cause, but no luck so far.

The problem is, that /usr/sbin/foreman-rake db:sessions:clear is a cronjob which is running every 24h, so every changes I do during the day are gone on the next day.

Environment:

- OS: Ubuntu 16.04.2 LTS
- DB backend: PostgreSQL 9.6.2
