

Foreman - Feature #18786

Summary of all DNS-Entries + adding DNS-Entries without creating a Host

03/03/2017 05:02 AM - Patrick Thyen

<div>Status:New</div> <div>Priority:Normal</div> <div>Assignee:</div> <div>Category:DNS</div> <div>Target version:</div> <div>Difficulty:</div> <div>Triaged:</div> <div>Bugzilla link:</div> <div>Pull request:</div>	<div>Fixed in Releases:</div> <div>Found in Releases:</div> <div>Red Hat JIRA:</div>
<div>Description</div> <div>It would be nice, if you can create multiple DNS-Records.</div> <div>e.g.</div> <div>If I create the Host test.vm, Foreman creates the A Record test.vm.</div> <div>But when I need more than this record, Foreman is not able to do this.</div> <div>An option to set more A-Record DNS-Entries would help me out, here.</div> <div>When creating a new Host you can set the name, which equals the DNS A-Record.</div> <div>Below that you could add a new option called "Subdomain" as a Dropdown-Menu.</div> <div>There you should only write the Subdomain you also need.</div> <div>e.g.</div> <div>New Host</div> <div>Name: test.vm</div> <div>Subdomain: more</div> <div>creates the DNS A-Records test.vm and more.test.vm</div> <div>or</div> <div>New Host</div> <div>Name: test.vm</div> <div>Subdomain: *</div> <div>creates the DNS A-Records test.vm and *.test.vm</div>	

History

#1 - 03/03/2017 05:05 AM - Patrick Thyen

e.g.

New Host

Name: test.vm

Subdomain: more

creates the DNS A-Records test.vm and more.test.vm

or

New Host

Name: test.vm

Subdomain: *

creates the DNS A-Records test.vm and *.test.vm

Name: test
