Foreman - Feature #18786

Summary of all DNS-Entries + adding DNS-Entries without creating a Host

Description

It would be nice, if you can create multiple DNS-Records.

e.g.
If I create the Host test.vm, Foreman creates the A Record test.vm.
But when I need more than this record, Foreman is not able to do this.
An option to set more A-Record DNS-Entries would help me out, here.

When creating a new Host you can set the name, which equals the DNS A-Record.
Below that you could add a new option called "Subdomain" as a Dropdown-Menu.
There you should only write the Subdomain you also need.

e.g.
New Host
Name: test.vm
Subdomain: more

creates the DNS A-Records test.vm and more.test.vm

or

New Host
Name: test.vm
Subdomain: *

creates the DNS A-Records test.vm and *.test.vm

History

#1 - 03/03/2017 05:05 AM - Patrick Thyen

e.g.
New Host
Name: test.vm
Subdomain: more

creates the DNS A-Records test.vm and more.test.vm

or

New Host
Name: test.vm
Subdomain: *

creates the DNS A-Records test.vm and *.test.vm

Name: test

Domain: vm
