

Smart Proxy - Bug #1885

user: "foreman-proxy" is unable to read inventory.txt

Description	
<p>I have installed a smart-proxy to manage PuppetCa. The foreman-user is able to do sudo puppetca and list certificates. But it can't read /var/lib/puppet/ssl/ca/inventory.txt since the folder ca is owned by puppet:root and it`s access-policy is set to 770. Whenever I change permissions to file and folder it is going to be reset by puppet the next time I click on certificates from the foreman Web-Ui. Output from the foreman-proxy log: E, [2012-10-04T11:32:20.947150 #27798] ERROR -- : Failed to list certificates: Unable to find CA inventory file at /var/lib/puppet/ssl/ca/inventory.txt</p> <p>The inventory.txt is present. But the foreman-proxy user can't pass /var/lib/puppet/ssl/ca/ even for reading.</p> <p>puppetd version = 2.6.17 foreman-proxy = 1.0.0-2</p>

Can you try making it owned by puppet:puppet? The foreman-proxy should be a member of the puppet group, will then be able to read the file.

That worked!
Thank you!
