Description

Unable to open Administer -> Settings in web interface

Oops, we're sorry but something went wrong undefined method `test_mail_user_url' for #<#<Class:0x007f2bf16b43f0>:0x0000000889bf90>

History

#1 - 03/14/2017 04:14 AM - Dominic Cleal

- Subject changed from undefined method test_mail_user_url to undefined method test_mail_user_url

- Category changed from Web Interface to Settings

#2 - 06/15/2017 07:56 AM - Swapnil Abnave

Hi Shod,
Can you please confirm, are you still facing this issue?

#3 - 06/15/2017 09:52 AM - Swapnil Abnave

- Target version set to 1.17.0-RC1

#4 - 10/21/2017 01:06 PM - Shod Dan

The issue has been fixed for me by truncating /usr/share/foreman/app/views/settings/category/_email.html.erb file with empty content

#6 - 07/23/2018 09:29 AM - Tomer Brisker

- Target version deleted (1.17.0-RC1)

#7 - 05/25/2021 09:09 AM - yifat makias

- Status changed from New to Closed

Looks like the issue has been fixed.
