Error code problem when running foreman under passenger

10/09/2012 11:03 AM - Gregory Etling

Pull request:	
Description	
<p>If \$foreman::passenger is set, foreman-passenger/manifests/service.pp sets the foreman service ensure to 'stopped.'</p> <p>However, 'service foreman status' from foreman-1.0.1-1.el6.noarch.rpm returns '0' out of the box when foreman is stopped.</p> <p>Therefore, puppet runs always attempt a 'service foreman stop,' which as foreman is not running (as desired) returns '1' and causes the puppet run to return an error.</p>	

History

#1 - 10/09/2012 12:00 PM - Gregory Etling

Reference [[<http://theforeman.org/issues/1472>]] for new init script behavior and update distribution specific files to adjust.

#2 - 06/19/2013 10:00 AM - Benjamin Papillon

- Status changed from *New* to *Closed*

I'm closing this ticket as now the init script returns the correct value (1)

Feel free to reopen it again in the case I'm mistaken :)
