Description

Installed a new 1.0.1 instance today, got an error trying to view params - they were not being pulled into a new host.

Pull request coming.

History

#1 - 10/10/2012 05:51 PM - David Swift

We suspect this appearing now is due to a change in some gem. Here is a diff of 'gem list' on my dev box (where the old template code works) and our new box that broke today.
