Description	
Detected on Foreman Version: 1.12.4	
Scenario: 1. Open the Foreman in "Hosts > Provisioning Templates" 2. Type some word in the search text box(see attached screenshot)	
Actual Result: Get the following Error(as you can see in the attached screenshot) Oops, we're sorry but something went wrong PG::Error: ERROR: invalid reference to FROM-clause entry for table "hostgroups" LINE 1: SELECT hostgroups.id FROM "hostgroups" "hostgroups_template_... ^ HINT: Perhaps you meant to reference the table alias "hostgroups_template_combinations". : SELECT hostgroups.id FROM "hostgroups" "hostgroups_template_combinations"	
Expected Result: Get search result without any error.
