

Foreman - Bug #1917

Solaris Sparc provisioning templates fix

10/26/2012 08:15 AM - Oliver Weinmann

Status:	Closed	
Priority:	Normal	
Assignee:	Oliver Weinmann	
Category:	Unattended installations	
Target version:	1.1	
Difficulty:		Fixed in Releases:
Triaged:		Found in Releases:
Bugzilla link:		Red Hat JIRA:
Pull request:		
Description		
While testing Solaris 10 Sparc deployment I noticed that puppet is not installed after the finish script ran. This is because by default the template installs the SUNWCreq cluster which doesn't include gzip. This is required for pkgutil to unpack all the packages.
