

Foreman - Bug #1918

Cannot dis-associate a template kind from an OS

10/26/2012 12:14 PM - Greg Sutcliffe

Description	
If you have a single template for a given template kind (say, script) then your combo-box in OS->Templates will look like: script: [blank] ScriptTemplate	
If you have selected ScriptTemplate in the past, and now select [blank] and Save the OS, the association isn't deleted - the OS still uses ScriptTemplate.	
This makes it impossible to then delete ScriptTemplate itself, as it's still in use by the OS.
