Foreman - Bug #19318

Plugins infrastructure don't work reliably in development

04/19/2017 09:10 AM - Ivan Necas

Status:	Duplicate

Pull request:			

Description

Plugins API is broken in development, to reproduce:

1. enable a plugin (see it in about page)
2. edit some model (such as app/models/setting.rb)
3. see the about page again: no plugin present (the same applies to menus)

This is a regression introduced by http://projects.theforeman.org/issues/18445/
