Can you provide version information? Precisely which version of Foreman and the smart proxy are you using?

Oh, that might be it, I'm using nightly foreman but my smart proxy is older(1.13).

- Related to Refactor #19295: Use new proxy API for getting information from DHCP added

#4 - 04/20/2017 03:37 AM - Dominic Cleal

- Subject changed from *unable to delete a host due to dhcp orchestration failure* to *Unable to delete a host due to DHCP orchestration failure with older smart proxy*

- Category changed from *Host creation* to *DHCP*

Likely due to [#19295](#) then, if you're on bf2c7da5 or later. This requires version 1.15.0-RC1 of the smart proxy or higher.

#5 - 04/20/2017 03:43 AM - Ohad Levy

I would suggest we actively notify users on this change(notification, about page, smart proxies page etc), I don't think that all users update all of their proxies (esp if people still have rhel6) at the same time.
