Pull request:	
Description Hosts which are managed by foreman may wish to be "locked" so that no changes are made. This lock should ensure that: 1) No new content is consumed by the host 2) No configuration changes are made to the host 3) No remote execution commands are sent to the host	
Related issues: Is duplicate of Foreman - Feature #10799: Host locking New 06/12/2015
