<b>Description</b>	
Hello Guys,	
Infos: Puppetserver 4.10.0 Foreman: 1.14.3 Foreman-Proxy: 1.14.3	
After upgrading to puppetserver 4 deleting hosts in Foreman leaves certificate on puppetserver intact.	
Configfiles: /etc/foreman-proxy/Settings.d/puppetca.yml	
1. PuppetCA managment :enabled: https :ssldir: /etc/puppetlabs/puppet/ssl :puppetdir: /etc/puppetlabs/puppet	
/etc/foreman-proxy/settings.d/puppet.yml	
:enabled: https :puppet_version: 4.10.0	
Puppetserver and Foreman are on same machine. Foreman-Proxy is running. If i delete a host in Foreman i can see nothing in the logfile	
/var/log/foreman-proxy/proxy.log	
But the communication between Foreman and Foreman-Proxy are OK. If i list all signed certificates in Foreman and look in the logfile	
/var/log/foreman-proxy/proxy.log	
Found puppetca at /opt/puppetlabs/bin/puppet Found sudo at /usr/bin/sudo Executing /usr/bin/sudo -S /opt/puppetlabs/bin/puppet cert --ssldir /etc/puppetlabs/puppet/ssl --list --all	
and in Foreman i see all certificates.	
Any idea? Can anyone help please.	
Regards mobios	

#### History

##### #1 - 04/26/2017 05:45 AM - Dominic Cleal

How were the hosts created? Are they "managed" in Foreman (button, top when editing it)?

**#2 - 04/27/2017 03:11 AM - Taner Tasar**

Thank you for your help Dominic.  
I forgot to press the managed button.  
Ticket can closed.

Best regards  
mobios
