Pull request:	
Description Upgraded to 1.15.0-RC2 on both our foreman server and our puppet smart-proxy server. When we go to import classes from that server, Foreman claims that there are no environments and wants to delete the environments that do exist. It looks like this issue: http://projects.theforeman.org/issues/18995 which looks like it got fixed, but we're still experiencing this behavior.	
Related issues: Is duplicate of Foreman - Bug #18995: Puppet class import removes existing en... Closed 03/23/2017

[#18995](#) is unfixed, it's still in New status. I'll mark this as a duplicate until that's resolved, thanks for the report.
