Description	
<p>While testing the https://github.com/ohadlevy/foreman.git branch vmware (cloned @ 15th november 2012) I get the following error when creating a VM with multiple harddisks:</p>	
<pre>Oops, we're sorry but something went wrong</pre>	
<pre>x failed to create vm: InvalidDeviceSpec: Invalid configuration for device '3'. If you feel this is an error with Foreman itself, please open a new issue with Foreman ticketing system, You would probably need to attach the Full trac></pre>	
<pre>RbVmomi::Fault failed to create vm: InvalidDeviceSpec: Invalid configuration for device '3'. lib/foreman/model/vmware.rb:73:in `create_vm' app/controllers/compute_resources_vms_controller.rb:18:in `create'</pre>

can you attach foreman log it self? I need the parameters passed

thanks!

Siert, can you provide the log that Ohad asked for? I'm going to work on this issue, but the params are always helpful :-)

I've found the issue and its in fog code, I've sent a pull request <https://github.com/fog/fog/pull/1424> to fix it.

in the meanwhile, you can try to patch the fog code directly (as the link above)

thanks!

#7 - 01/02/2013 07:38 AM - Ohad Levy

actually, it was <https://github.com/fog/fog/pull/1437>

and I've pushed it upstream to fog, so, once a newer fog version is out, you're covered.
