#### Description

sinatra 2.0.0 has been released, which requires Ruby 2.2.0 or higher. It should be pinned to 1.x on Ruby 2.0 and 2.1.

Builds on Ruby 2.0/2.1 fail with:

```
+ bundle install --without=development
Your Gemfile lists the gem single_test (>= 0) more than once.
You should probably keep only one of them.
While it's not a problem now, it could cause errors if you change the version of one of them later
.
Your Gemfile lists the gem rdoc (>= 0) more than once.
You should probably keep only one of them.
While it's not a problem now, it could cause errors if you change the version of one of them later
.
The dependency highline (>= 0) will be unused by any of the platforms Bundler is installing for. Bundler is installing for ruby but the dependency is only for x86-mingw32, x64-mingw32. To add those platforms to the bundle, run `bundle lock --add-platform x86-mingw32 x64-mingw32`.
The dependency win32-service (>= 0) will be unused by any of the platforms Bundler is installing for. Bundler is installing for ruby but the dependency is only for x86-mingw32, x64-mingw32. To add those platforms to the bundle, run `bundle lock --add-platform x86-mingw32 x64-mingw32`.
