Description	
Even if specified else, all my VMs end up with 768MB memory. Using ESX 5 with the vmware branch of november 15th 2012.	
The post to foreman seems fine:

fixes #1949 - VMware creation: vm's always get 768MB memory

I've removed the select box too, and would add a slider in a later commit

Assigning this to Ohad since he's done most of the VMWare work.

#2 - 11/23/2012 02:50 PM - Siert Z.

Note that foreman host virtual machine properties will always list 512MB (536870912) installed.

I'm going to dig into this now.

#4 - 12/18/2012 11:22 PM - Sam Kottler

I can reproduce this issue. I spent some time looking at it today and think I know the root cause so hopefully I'll get a PR in tomorrow!
