Triaged: No	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description	
Notifications are flooding our logs with 200 HTTP messages, use this or similar technique to silence it completely. This should be a YAML setting and it should be disabled by default, but user should be able to enable it via config flag and restart on demand:	
https://archive.dennisreimann.de/blog/silencing-the-rails-log-on-a-per-action-basis/	
<pre>[app I] Started GET "/notification_recipients" for 127.0.0.1 at 2017-05-15 10:02:50 +0200 [app I] Processing by NotificationRecipientsController#index as JSON [app I] Current user: admin (administrator) [app D] Setting current user thread-local variable to admin [notifications D] Cache Hit: notification, reading cache for notification-3 [app D] Body: {"notifications":[{"id":17,"seen":false,"level":"info","text":"somehost-265776 has been deleted successfully","created_at":"2017-05-15T06:44:26.196Z","group":"Hosts","actions":{}}]} [app I] Completed 200 OK in 3ms (Views: 0.1ms ActiveRecord: 0.2ms)</pre>

History

#1 - 05/15/2017 04:13 AM - Lukas Zapletal

When notification (or any arbitrary path) is silenced and response is non 2xx we can log short message about it asking user to change the setting to see the logs.
