<div>Description</div> <div>Hi,</div> <div>I would like to make accidental deletion of a host harder for my admins/users. I'd like the dialog to be changed from a simple yes/no to something along the lines of a gitlab repository deletion where one needs to reenter the name of the host to affirm the deletion. This should make accidental deletion a lot harder :)</div> <div>Thanks!</div> <div>Greetings</div> <div>Klaas</div>
