<b>Description</b>	
If I have a host group that has a location selected

This is on latest develop/master branch for foreman/katello	

#### History

#1 - 05/16/2017 03:17 AM - Dominic Cleal

- Tracker changed from Bug to Feature
- Subject changed from Host group doesn't update location field in new host page to Inherit host location/organization from host group
- Category set to Host creation

This isn't meant to happen, a host group can be assigned to many orgs and locations, but a host is assigned to one. The loc/org selection occurs before the host group and usually should come from the current context instead. Changing to a feature request.
