Pull request:		
Description Please assist in packaging up the foreman_azure_rm plugin here: https://github.com/01100010011001010110010101110000/foreman_azure_rm Note: 1.) I am not the author of this code, but I high a very high need for this functionality 2.) This is NOT the same code as the foreman_azure plugin, as that doesn't support the Azure Resource Group model 3.) There is a fair number of dependencies required here 4.) I somehow got this working on a packaged install of Foreman, though I was unable to get it to work with our production Foreman+Katello installation due to dependency problems, which is why I am asking for this to be packaged.		

History

#1 - 05/19/2017 01:13 PM - Josh Pavel

- Category changed from Compute resources to Packaging

#2 - 05/22/2017 03:32 AM - Dominic Cleal

- Tracker changed from Support to Feature

- Project changed from Foreman to Packaging

- Category deleted (Packaging)

#3 - 04/05/2018 03:31 PM - Ewoud Kohl van Wijngaarden

I'd advise on following <https://github.com/theforeman/foreman-packaging/tree/rpm/develop#adding-gem-packages>. Feel free to ask us on help in #theforeman or #theforeman-dev if you want more direct feedback. Probably easier than going back and forth in this issue.

#4 - 04/05/2018 09:19 PM - Anonymous

I'd rather advocate we move away from fog 1.x and thus we should be able to use a non-forked version of the respective fog gem.
