Description	
Hi,	
In Smart Class Parameters, the "Override Value for Specific Host" - Input-type should be a textarea like the input-type for default value.	
For the default value, it is possible to be of type "hash" and paste a yaml. When overriding, It is actually possible to use json, but you lose readability.	
Thanx, florian	
ForemanVersion: 1.0.1-7 - RPM Package from 2012-11-21, devel-yum repository - everything installed via rpm Platform: RedHat 6.3 x86_64 Postgresql: 9.2 Puppet: 3.0.1
