

## Foreman - Feature #19688

### Choose what facts/values to export through WebUI

<b>Description</b> When exporting data from Foreman via the WebUI, we would like to select what data we export.  E.g., ServerName, Memory, Cores, Serial Number, and IP Address  Ideally this would be variable and can be changed dynamically.  As it is currently, we can export a single fact at a time and we have to correlate the data by hand.
