<b>Pull request:</b>		
<b>Description</b>		
Using Puppet 3 with the proxy, if "puppet_conf" isn't specified then settings can't be initialised:		
E, [2012-11-27T15:27:06.939586 #23663] ERROR -- : Failed to show puppet environment: Error converting value for param 'config': Could not find value for \$confdir		
The Debian package currently ships without this setting specified.		

#### Associated revisions

##### Revision 7530ea4b - 12/05/2012 09:15 AM - Dominic Cleal

fixes #1983 - use /etc/puppet/puppet.conf by default

When initialising Puppet 3 settings directly, a config dir or file is required, so default to /etc/puppet/puppet.conf (as the puppetca code also does).

This was done in [pr#13](#) but I left it commented out to indicate the default in the code.
