Description

On /reports/, it currently shows things like '3 days ago' rather then actual timestamps. This isn't terribly useful if you're looking at reports older then an hour ago. I have pages and pages of reports that appear all the same with just 'X days ago' as the time.

Please consider showing an actual timestamp here (like 'Dec 3 2012 1:36PM') so it's easier to determine what reports were executed when.

History

#1 - 12/05/2012 05:07 PM - Jeremy Kitchen

I would love this as well. I was just now searching for a puppet run near a certain timestamp and had to pretty much guess on which report to look at.

+1
