Description	
On versions of Ruby < 2.2.2 , rails-observers fails to install according to the current Gemfile.	
Gem::InstallError: rails-observers requires Ruby version >= 2.2.2. An error occurred while installing rails-observers (0.1.4), and Bundler cannot continue. Make sure that `gem install rails-observers -v '0.1.4'` succeeds before bundling.	
This breaks test_develop_pr_upgrade , as it can't bundle install and therefore run the upgrade tests.
