**Description**

I upgraded to 1.1 RC1 and created a new Org. When I go to edit a host and change the Org it changes it from oVirt to Bare Metal and refuses to assign it to the new org saying that the host already exists. If I change it back to Ovirt I just get a blank page that says '2012' and it still is not assigned to the new Org.

## Associated revisions

**Revision 671b45e9 - 01/24/2013 07:52 AM - Joseph Magen**

fixes #2033 - Cannot assign a host to an org

Now its possible to change Locations / Organizations only via mass assign

## History

**#1 - 12/11/2012 01:26 PM - Ohad Levy**

1. do you have the ovirt compute resource assigned to your org/location ?
2. you probably want to assign hosts to orgs/locations first (by using the checkboxes).

**#2 - 12/11/2012 01:47 PM - Anonymous**

Yes, every available compute resource, subnet, domain, etc. is assigned to both the org and location that I am using.

**#3 - 12/31/2012 08:02 AM - Jasper Poppe**

I also have this issue with locations, even when the location is not bound to any resources.

Steps to reproduce:
Create a new location
Try to add an existing host to that location
Foreman now tries to create a host instead of editing the host that's the reason of the host already exists error. If more details are needed, please ping me ;)

*- Assignee set to Joseph Magen*

*- Target version set to 1.1*

**#5 - 01/07/2013 04:23 PM - Sam Kottler**

Where does this stand? I can work on it if you're doing other stuff @Joseph.

**#6 - 01/10/2013 07:52 AM - Ohad Levy**

switching an host location/org should happen only via the bulk update, Joseph will fix it in his commit
