#### Description

RPMs for apipie-rails and rabl are missing from the RC repo. The fog 1.8 package is present but the foreman spec file sets the requirement as  $\geq 1.4$  so the updated package isn't pulled in by yum during an upgrade.

```
[root@ctrl foreman]# rake db:migrate RAILS_ENV="production"
rake aborted!
Could not find gem 'apipie-rails (>= 0)' in any of the gem sources listed in your Gemfile.

I've just updated the RC repo with the new gems and requirements. Can you test it out?

##### #4 - 12/12/2012 01:24 PM - Joshua Hoblitt

I stripped out the manually installed gems and some of the foreman packages. Deps look good now!
