<b>Pull request:</b>	
<b>Description</b>	
Foreman foreman-1.1RC1-3.el6.noarch	
uninitialized constant Apipie::ParamError	
BT	
/usr/share/foreman/app/controllers/api/base_controller.rb 19	
When I comment block all work smoothly:	
<pre>1. rescue_from Apipie::ParamError, :with =&gt; lambda {  error  2. Rails.logger.info "#{error.message} (#{error.class})" 3. render_error 'param_error', :status =&gt; :bad_request, :locals =&gt; { :exception =&gt; error } 4. }</pre>	

### History

#### #1 - 12/13/2012 04:35 PM - Sam Kottler

- Status changed from New to Closed

This was an issue with the packaging for apipie. Running an update of the rubygem-apipie-rails package will fix it.

Sorry for the inconvenience!

#### #2 - 12/14/2012 05:34 AM - Viacheslav Biriukov

Thanks!
