Description	
In foreman 1.7 it was possible to edit number of cpu cores and memory when the VM was stopped. In foreman 1.15.2 it's not possible	
Found in version: - foreman 1.15.2 - rhev 4.1	

History

#1 - 03/04/2019 08:55 AM - Filip Brychta

- Found in Releases 1.21.0 added

This is still not possible in 1.21
Any update? Is it bug or is it expected?

#2 - 08/06/2021 11:33 AM - Leos Stejskal

- Status changed from New to Closed

Hi, it's been a while since the last update, so I'm closing the issue.
If you think that the issue is still relevant, please feel free to reopen it.
