

Foreman - Bug #20490

Audit log does not show complete values for multi-line fields

08/02/2017 01:37 PM - Daniel Kimsey

Pull request:	
Description	
The audit log records changes made to Host configurations such as: "Update Override Value: fqdn=my.example.com / ssh::server_options".	
However it only lists the first line of the Value's changes. For multi-line fields this is not useful.	
I'd like it to show the complete value of a given field, otherwise there isn't much use in the audit record.
