<b>Pull request:</b>	
<b>Description</b>	
<p>Revoked certificates are purely informational, and low-value information at that. We should match the "puppet cert" output, and only display valid+pending certificates by default. The filters are there if people <i>really</i> want to see the revoked ones.</p> <p>This is very useful to me: at time of writing, I have 80+ revoked certs, 7 valid, and 1 pending. It's hard to find the useful data with pagination=&gt;20 :)</p> <p>Patch incoming.</p>
