Description	
The proxy requires the rubyipmi gem to enable BMC support, but this isn't available from the repos. It would be useful as an optional package.

+1 to this, ofc. Do you think we should wait until the IPMI changes are exposed through the UI to package up the gem to reduce the maintenance burden? Is that slated for 1.1?

Yeah, I think that's fair as the proxy BMC support will have little/no use until that's done. I don't think it's due for 1.1, so far only the proxy glue code [is in 1.1](#), no UI yet.
