

HTTPS URL for oVirt shouldn't be mandatory

Status: Closed Priority: Normal Assignee: Dominic Cleal Category: Compute resources Target version: 1.1 Difficulty: Triaged: Bugzilla link: Pull request:	Fixed in Releases: Found in Releases: Red Hat JIRA:
Description re #1899 , the URL for oVirt <i>can</i> be HTTP without HTTPS available, e.g. in development environments.	
Related issues: Related to Foreman - Bug #1899: Can't create new ovirt VM due to http 302 error	
	Closed 10/16/2012

Revision 85ed3c3f - 12/24/2012 03:51 AM - Dominic Cleal

rest_client will refuse to follow redirects on POST requests, so the URL must be entered as HTTPS. Don't require HTTPS as dev environments may be HTTP-only.
