Description re #1899 , the URL for oVirt <i>can</i> be HTTP without HTTPS available, e.g. in development environments.	
Related issues: Related to Foreman - Bug #1899: Can't create new ovirt VM due to http 302 error Closed 10/16/2012	

Associated revisions

Revision 85ed3c3f - 12/24/2012 03:51 AM - Dominic Cleal

fixes #2061 - test if oVirt API has HTTPS redirect

rest_client will refuse to follow redirects on POST requests, so the URL must be entered as HTTPS. Don't require HTTPS as dev environments may be HTTP-only.
