

Foreman - Bug #20765

API server gives incorrect error message for non-existent parameter

08/28/2017 10:44 AM - Sebastian Gräßl

Status: Closed	
Priority: Normal	
Assignee:	
Category: API	
Target version:	
Difficulty:	Fixed in Releases:
Triaged: No	Found in Releases:
Bugzilla link: 1418346	Red Hat JIRA:
Pull request:	
Description Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1418346	
Description of problem: API error message when using a non-existing parameter is not helpful	
Version-Release number of selected component (if applicable): Version Satellite 6.2.6	
Steps to Reproduce: 1. [root@rhel7-3-server ~]# curl -H "Accept:application/json,version=2" -H "Content-Type:application/json" -X POST -u admin:password -k -d '{"architecture_id":1,"environment_name":"production","domain":"example.com","domain_id":1}' https://sat6-2.example.com/api/hosts python -m json.tool % Total % Received % Xferd Average Speed Time Time Time Current Dload Upload Total Spent Left Speed 100 172 0 78 100 94 618 745 --:--:-- --:--:-- --:--:-- 746 { "error": { "message": "Domain(#74961060) expected, got String(#3712880)" } }	
Actual results: { "error": { "message": "Domain(#74961060) expected, got String(#3712880)" } }	
Expected results: "Unknown parameter" error.
