

## Foreman - Bug #20986

### user\_id parameter in ssh key create action is wrongly documented

09/18/2017 02:28 PM - Tomáš Strachota

<b>Status:</b> Closed																
<b>Priority:</b> Normal																
<b>Assignee:</b> Tomáš Strachota																
<b>Category:</b> Users, Roles and Permissions																
<b>Target version:</b> 1.17.0																
<b>Difficulty:</b> trivial	<b>Fixed in Releases:</b>															
<b>Triaged:</b>	<b>Found in Releases:</b>															
<b>Bugzilla link:</b>	<b>Red Hat JIRA:</b>															
<b>Pull request:</b> <a href="https://github.com/foreman/foreman/pull/4855">https://github.com/foreman/foreman/pull/4855</a>																
<b>Description</b>																
The API docs for																
POST /api/users/:user_id/ssh_keys																
document the :user_id parameter as nested in ssh_key hash but the server expect it on the first level as it's a route parameter. This causes issues in hammer that uses the documentation to automatically build the request data.																
<b>The current documetation:</b>																
<table><thead><tr><th>Param name</th><th>Validations</th><th>Description</th></tr></thead><tbody><tr><td>ssh_key</td><td>Hash</td><td></td></tr><tr><td>ssh_key[name]</td><td>String</td><td></td></tr><tr><td>ssh_key[key]</td><td>String</td><td>Public SSH key</td></tr><tr><td>ssh_key[user_id]</td><td>String</td><td>ID of the user</td></tr></tbody></table>		Param name	Validations	Description	ssh_key	Hash		ssh_key[name]	String		ssh_key[key]	String	Public SSH key	ssh_key[user_id]	String	ID of the user
Param name	Validations	Description														
ssh_key	Hash															
ssh_key[name]	String															
ssh_key[key]	String	Public SSH key														
ssh_key[user_id]	String	ID of the user														
<b>Expected result:</b>																
The :user_id parameter should be documented on the first level, outside of the ssh_key hash:																
<table><thead><tr><th>Param name</th><th>Validations</th><th>Description</th></tr></thead><tbody><tr><td>user_id</td><td>String</td><td>ID of the user</td></tr><tr><td>ssh_key</td><td>Hash</td><td></td></tr><tr><td>ssh_key[name]</td><td>String</td><td></td></tr><tr><td>ssh_key[key]</td><td>String</td><td>Public SSH key</td></tr></tbody></table>		Param name	Validations	Description	user_id	String	ID of the user	ssh_key	Hash		ssh_key[name]	String		ssh_key[key]	String	Public SSH key
Param name	Validations	Description														
user_id	String	ID of the user														
ssh_key	Hash															
ssh_key[name]	String															
ssh_key[key]	String	Public SSH key
