Description

Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1391255

Steps to Reproduce:
1. Create an installation media with a name of 86 characters or more
2. Try to deploy a new host or modify a group, in the Operating System tab, the field for Installation Media will not show completely,

Expected Result:

Select should wrap longer text to show the whole name of the installation media.
