<b>Description</b>	
Reported in <a href="#">#2085</a> :	
When \$confdir variable is used in puppet.conf, no environment is available at all - rake puppet:import:puppet_classes RAILS_ENV=production returns empty array. Sample string in puppet.conf from Puppet Docs: modulepath = \$confdir/environments/\$environment/modules:\$confdir/modules <a href="http://docs.puppetlabs.com/guides/environment.html">http://docs.puppetlabs.com/guides/environment.html</a>
