#### Description

On Foreman 1.15.4 I am getting a failure to launch script on a new host using the EC2 compute resource without cloud-init (IE finish script). I think it has to do with the SSH attempting before the SSH public key is added for the user as I can ssh into the host with the private key myself and when I look at /var/log/secure I see:

### #3 - 10/01/2017 04:21 PM - Julio Valcarcel

Upon further investigation, the IOError being thrown by net-ssh is documented <https://github.com/net-ssh/net-ssh/issues/75> and not something that it can handle. I think this issue arises because the AMI I am using (Centos 7 provided) restarts the SSH daemon and doesn't send a disconnect to the client causing the IOError from net-ssh. I submitted a pull request for this issue and my proposed fix on <https://github.com/theforeman/foreman/pull/4880>
