

Foreman - Feature #21163

Go back to "Filters" instead of "Roles" index after adding a filter

Pull request:	
Description	
Description of problem:	
After submitting a new filter to the role in UI, user lands back at the Roles list. Therefore, to add another filter, user has to select the role again and direct to the Filters tab, which is cumbersome when adding multiple filters.	
Expected results:	
After submitting a filter, user should land at the filters tab of the edited role, so that he can review what was added and possibly add more.
