Description	
Steps to reproduce: <ol style="list-style-type: none">1. Add remote execution plugin to local gemfile2. Add a job template3. Remove remote execution plugin from gemfile4. Try to create a Location	
When trying to save the following error appears: The single-table inheritance mechanism failed to locate the subclass: 'JobTemplate'. This error is raised because the column 'type' is reserved for storing the class in case of inheritance. Please rename this column if you didn't intend it to be used for storing the inheritance class or overwrite Template.inheritance_column to use another column for that information.
