Pull request:	
Description	
When converting a SQLite database to PostgreSQL, I was unable to import messages from my reports:	
<pre>PG::Error: ERROR: index row size 3352 exceeds maximum 2712 for index "index_messages_on_value" HINT: Values larger than 1/3 of a buffer page cannot be indexed. Consider a function index of an MD5 hash of the value, or use full text indexing.</pre>	
The message contained large file diffs.
